Introduction

Easy bakery is a small business that benefits homemade pastries, custom-made cakes, and more kinds of sweets, so our mission for this website is to make ordering sweets and pastries efficient and easy.

Every customer must create a new account to log into. They can start ordering or go through the shop page and add the item they want to their cart and the admin side. The administrator can do multiple things like update, edit, and Delete items.

Print screen of all codes:

Admin login: *Figure 3- admin login1*

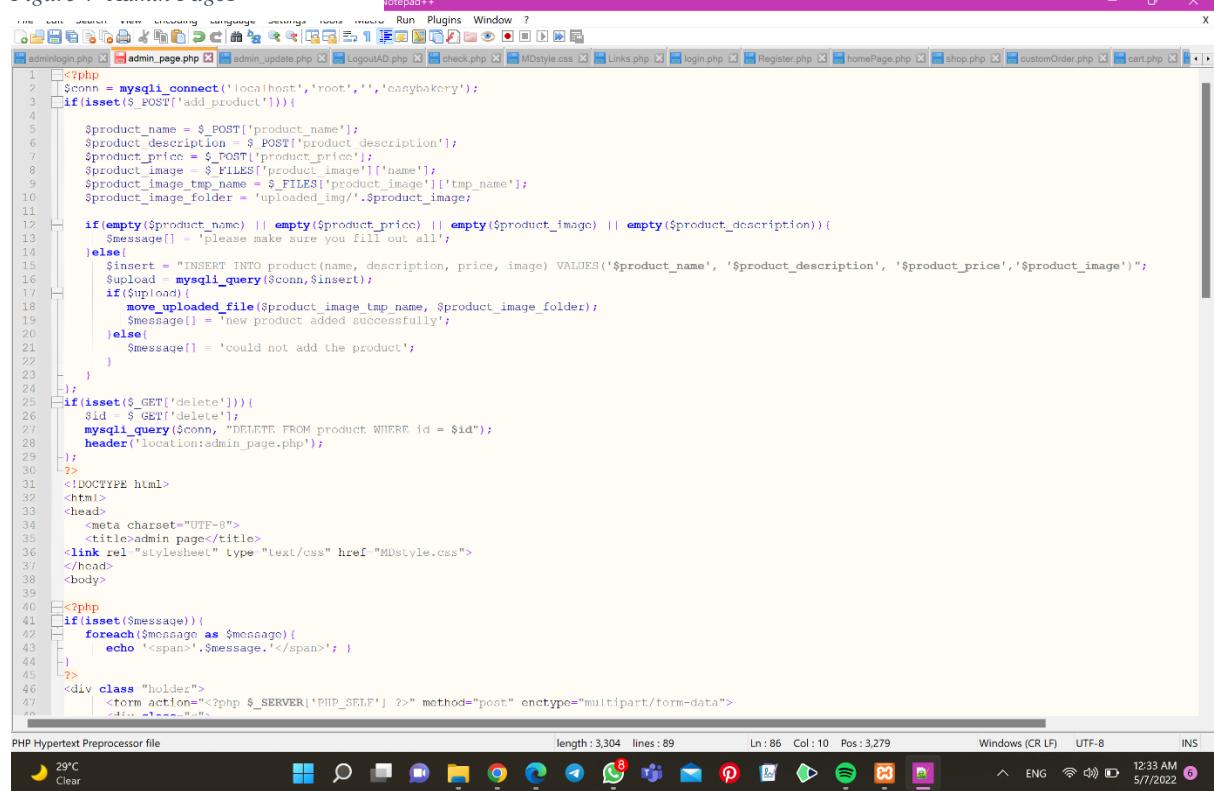

The screenshot shows the Notepad++ application window displaying the contents of the file 'adminlogin.php'. The code is a PHP script for an administrator login page. It includes HTML structure, CSS links, and a form for user input. The Notepad++ interface shows various tabs at the top and bottom status bars indicating file length, line count, and current position.

Figure 18 - HomePage3

The screenshot shows the Notepad++ editor window with the file "HomePage.php" open. The code is a PHP script with some CSS and HTML. It includes functions for navigating slides, displaying current slides, and styling elements. The footer section contains social media links and contact information. The status bar at the bottom provides file statistics and system information.

```
109 let IndexSL = 0;
110 showSlides(IndexSL);

User logout:

Figure 27- user logout

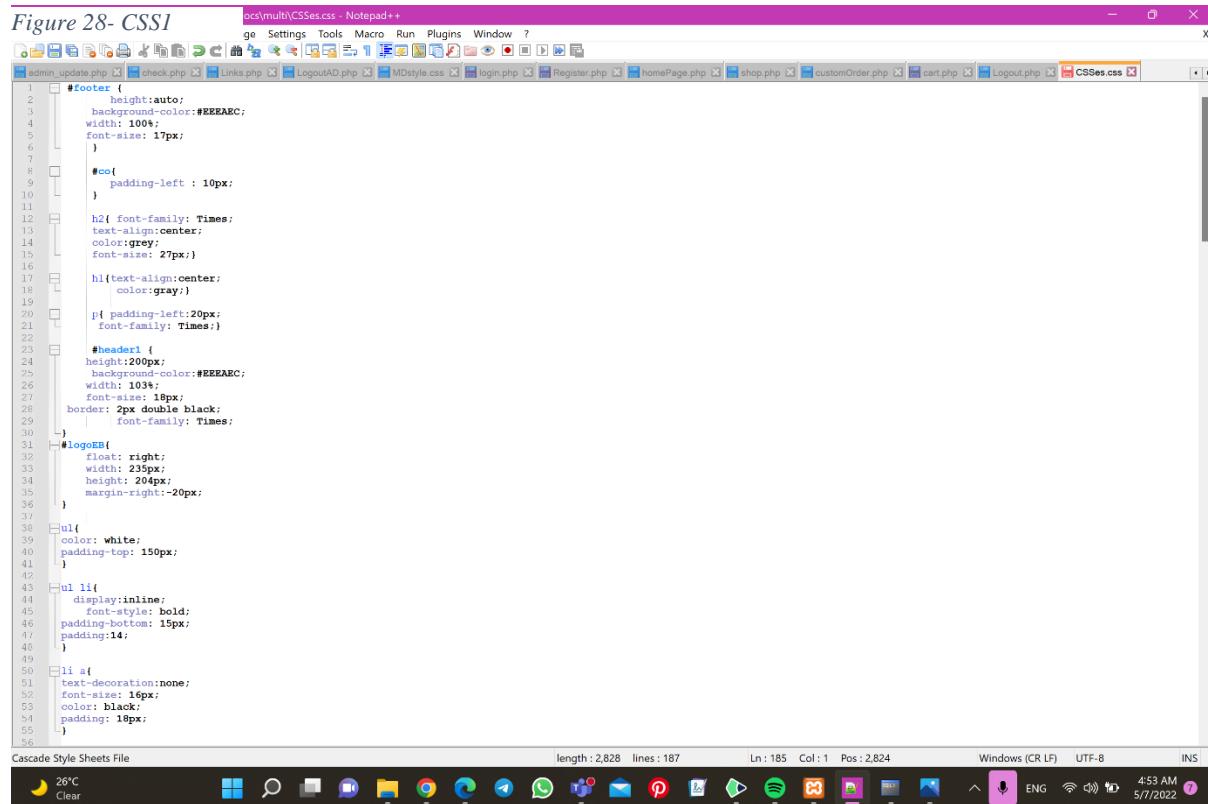

The screenshot shows a Notepad++ window with the title "Logout.php". The code in the editor is as follows:

```
1 <?php
2 session_start();
3 session_destroy();
4 header('location:login.php');
5 exit();
6 ?>
```

The status bar at the bottom provides information about the file: "PHP Hypertext Preprocessor file", "length : 93", "lines : 9", "Ln : 9", "Col : 3", "Pos : 94", "Windows (CR LF)", "UTF-8", and "INS". The taskbar at the bottom of the screen shows various application icons, including a weather icon (26°C), a search icon, and several communication and productivity tools.

Figure 36-Users table

The screenshot shows the phpMyAdmin interface for the 'users' table in the 'easybakery' database. The table has columns: id, location, email, phone_num, password, and username. Two rows are present: one for 'reema' located in 'riyadh' with id 3, and another for 'raseel' located in 'riyadh' with id 4. The interface includes a SQL query editor at the top with the query: 'SELECT * FROM `users`'. Below the table are two sets of buttons for sorting, filtering, and performing actions like insert, update, delete, and copy. The right sidebar lists other databases and tables, and the bottom shows the Windows taskbar.

id	location	email	phone_num	password	username
3	riyadh	0	11223344	reema	3
4	riyadh	0	11223344	raseel	4

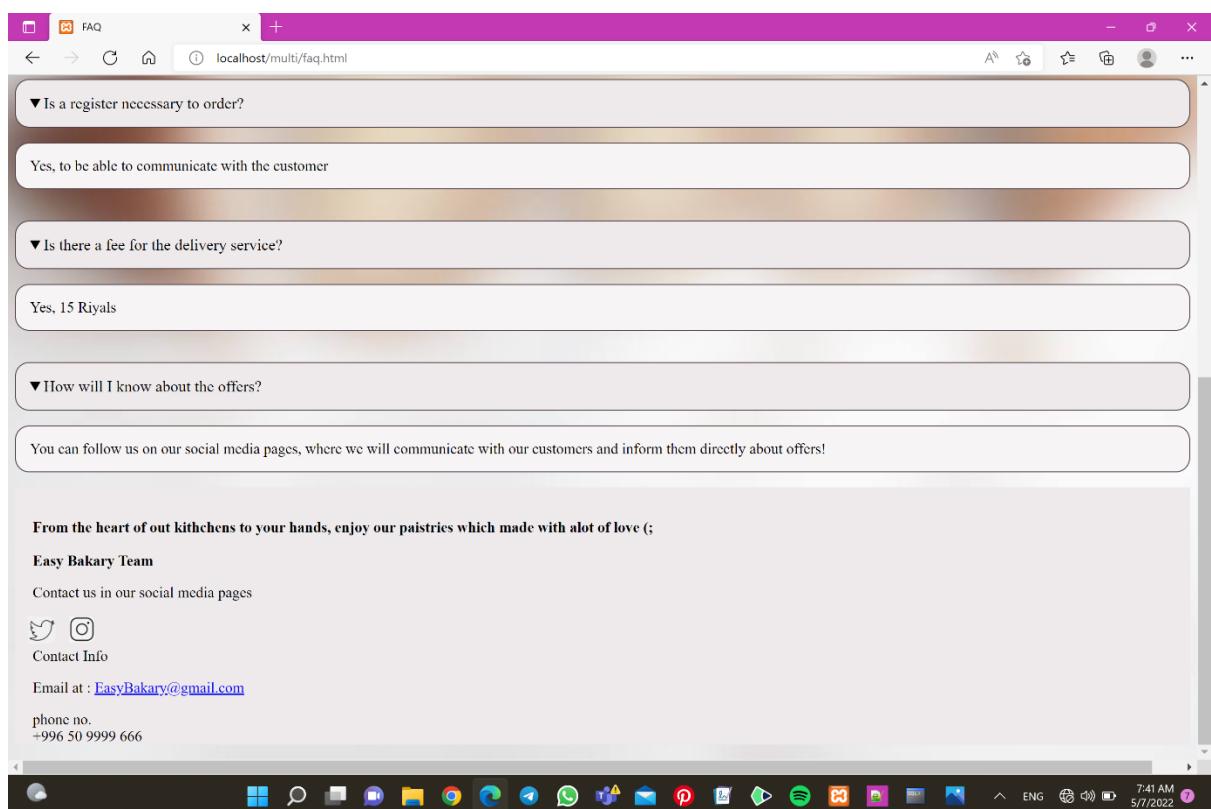

Figure 53- shopping cart

The screenshot shows a Windows desktop environment with a web browser window open to `localhost/multi/cart.php`. The browser title bar says "Login" and the address bar shows the URL. The page header includes links for "Home", "Shop", "custom order", "FAQ", and "Log out". The main content area is titled "reema cart". It displays a table of items in the cart:

ID	Name	Quantity	price	Action
249	almond	1	10	delete
262	Zaatar croissant	1	7	delete
267	Chocolet chip cookie	1	6	delete

Below the table, it says "Cart Total = 23 SR". There are payment method icons for "Apple Pay" and a credit card. At the bottom of the page, there is a message from the bakery team.

From the heart of our kitchens to your hands, enjoy our pastries which are made with lots of love (:
